Anjali Sinkar

Phone: +91 9022391831 | Email: anjalisinkar16@gmail.com
LinkedIn | GitHub

SKILLS

Programming: Python, SQL, Python Libraries
Generative AI: Prompt Engineering, LLM Integration, Agentic AI, AI Chatbot, Gemini API, Groq API, Ollama
Machine Learning: Scikit-learn, XGBoost, Feature Engineering, NLP, EDA
Data Engineering: ETL Pipeline, Data Warehousing, Hadoop, PySpark
Cloud & DevOps: AWS, Docker(Basic), Kubernets(Basic)

EDUCATION

Dr. D. Y. Patil Institute of Technology, Pimpri **2022 - 2026**
B.E. - Artificial Intelligence & Data Science | CGPA : 8.48 /10

SSMS Arts, Science & Commerce College, Pachora **2022**
12th | Percentage: 82.17 / 100

SGS Highschool, Pachora **2020**
10th | Percentage : 93.60/100

EXPERIENCE

Programmer Analyst Intern - Cognizant Technology Solutions **Feb 2026 - May 2026**

- Built SQL queries to extract and transform business data.
- Developed Python scripts for preprocessing datasets.
- Worked on ETL workflows and data validation.
- Applied Machine Learning techniques for analytical use cases.
- Collaborated in Agile SDLC environment.

PROJECTS

Virtual Patient Recruitment for Clinical Trials

- **Tech Stack:** Python • Flask • React • PostgreSQL • Scikit-learn • XGBoost
- Engineered an AI-driven clinical trial recruitment platform (React, Flask, PostgreSQL) leveraging XGBoost and Scikit-learn for automated patient eligibility screening.
- Implemented real-time inference pipelines through REST APIs, seamlessly connecting frontend form submissions to backend ML model evaluation and database storage.
- Developed a scalable architecture featuring dynamic data routing, automated schema initialization, and a centralized analytics dashboard for real-time monitoring.

MindMate: AI-Driven Mental Health Buddy

- **Tech Stack:** Python • Flask • SQLite • JavaScript • CSS • Gemini API • Groq API
- Engineered an AI-driven mental health support platform (Flask, SQLite, JS) leveraging Gemini and Groq APIs for automated user sentiment response generation.
- Implemented real-time response routing through Flask APIs, connecting frontend chat components to a multi-LLM orchestration layer and database storage.
- Developed a rule-based crisis intervention system featuring automated emergency resource matching and dynamic daily session usage tracking.
